COMPUTER-BASED TRAINING

CASA RPL, PPL and CPL

FTAONLINE offers students and aviation personnel the means of studying online in preparation for classroom sessions or as revision for their CASA theoretical knowledge examinations.

The FTA online aviation academic training system features 140 hours of theoretical courseware, manuals, glossaries, assessments and is managed by our learning management system.

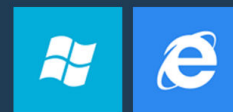

Integrated System

The "just-in-time" capability of distance learning provides a first tier of support to users of new technologies and allows FTA to provide a cost effective service to industry.

The service delivers an integrated distance learning solution for CASA RPL, PPL, and CPL ground school theory requirements. FTA's innovative solution will keep you ahead of your theory requirements whilst providing customer service demanded by our airline partners.

System Requirements

Microsoft Windows PC

- Windows 7 or later
- Internet Explorer 10+
